Kayode Ayomide Damilare

Sari Iganmu-Orile, Lagos
Mobile: +234 811 307 4792 **Alternate:** +234 906 640 6618
kayodeayomide677@gmail.com

I am a proficient backend developer with strong expertise in **C#** (ASP.NET Core) and **JavaScript**, including **Node.js** with **Express.js**. I have concrete experience building robust, scalable, and high-performance web applications and RESTful APIs. My foundation in object-oriented programming, software architecture, and design patterns enables me to create maintainable and scalable software solutions.

I excel in designing and integrating third-party APIs, managing both SQL and NoSQL databases, and ensuring seamless cross-platform performance. My strengths include debugging, software design, and building API-driven systems that support both web and mobile platforms.

EDUCATION

UNIVERSITY OF BENIN June. 2024.
Bachelor of science, Health Education.

WORK EXPERIENCE

Full-Stack Developer – OGW Terminal

I led the development of a robust inventory management system at OGW Terminal. As a full-stack developer, I work across both front-end and back-end layers, JavaScript / Node.js + Express for API and business logic.

Back-end software Developer - Developers Mentorship Community

- Designed and developed scalable web applications using C# and .NET Core, enhancing system performance through code optimization and refactoring
- Built and maintained RESTful APIs for internal and external integrations, implementing security best practices to ensure data protection.

Professional Certificate

Certified in Backend Development Using ASP.NET
Certified in Building Services with ASP.NET Web API
Certified in Minimal API Development with ASP.NET Core
Certified in Foundations of coding Backend with C# by Microsoft

SKILLS

Technical Skills:
Tools & Platforms: Visual Studio, Visual Studio Code, Git, GitHub. Databases: Microsoft SQL Server, MySQL, PostgreSQL. Mongoose db

Languages & Frameworks: C#, .NET Core, ASP.NET MVC, Entity Framework Core. Html, CSS, React, Java script

Soft Skills: Attention to Detail, Organizational Skills, Patience and Persistence, Leadership, Communication, Problem solving, Teamwork, Conflict Resolution, , Persuasion and Influence, Adaptability , critical thinking, Time management and Collaboration.

PROJECTS

E-commerce platform

Description: Developed an e-commerce platform with real-time data processing system using C# and .NET Core, enabling specific outcomes or improvements. Technologies: C#, .NET Core, SQL Server Responsibilities: Designed and implemented core backend services, optimized data processing workflows, and reduced latency by 90% through performance tuning.

School website

Description: Built and deployed a scalable API for with features such as authentication, role-based authorization with real word data processing using c# and net core.

Technologies: C#, ASP.NET Core, JWT, SQL Server.

Responsibilities: Developed secure authentication workflows, implemented data handling logic, and improved response time through caching mechanisms.

Running club platforms

A scale running platform with authentication, role based authorization, with dashboard where user can view other users with their location details and upload images. **Others includes**

Digital calculator

Digital Time clock And many more

Car renting website

Developed a full-stack car rental web application using **Node.js**, **Express**, **JavaScript**, and **Tailwind CSS**.

Built a RESTful API to handle bookings, availability checks, user authentication, and payments.

Designed a responsive, mobile-friendly interface for customers and admins.

Implemented secure user roles, document verification, and real-time booking validation.

Structured and managed the database for vehicles, users, and transactions to support scalable operations.

Digital Time clock And many more

HOBBIES

Researching, writing, networking, reading and exploring new innovation.

REFEREES

Available on Request.
